

Chase Mobile Checkout

BENEFITS AT A GLANCE

- Ability to securely accept payments wherever you go
- Mobile access to your Chase Paymentech account that includes reporting and transaction search
- Hassle-free setup and save on startup costs with no required terminal purchase

Accepting Payments Wherever Your Business Is Growing

One of the most important aspects of successfully growing your business is ensuring convenience for your customers. This means offering them the payment options they want.

Chase Mobile Checkout allows you to accept credit and debit card payments wherever your business takes you. All you need is a smartphone with the Chase

Mobile Checkout app, our card reader and an account with Chase Paymentech. Now, you're ready to grow your business – whenever and wherever you want to.

- Accept all major credit cards.
- Process signature debit and gift cards.
- Benefit from mobile access to your Chase Paymentech merchant account.
- Process voids and refunds as needed.
- Process with confidence – secure and password-protected.

A Partner You Can Trust

Chase is a brand you can trust. We are an established financial institution that has a vested interest in your business' success. What does this mean for you? As your business grows, we can grow with you.

Already processing credit cards with Chase Paymentech? Now you can have all your account information in one place, with one statement.

Peace of Mind that Only a Secure Solution Can Provide

Chase Mobile Checkout provides point-to-point encryption for your processing. This means that when your customers' credit cards are swiped, you can have the peace of mind that their sensitive data is not stored on your smartphone.

In addition, Chase Mobile Checkout allows you to reduce your fraud risk by being able to process the transaction at the point of sale – as opposed to writing down the card number and processing it when you get back to your terminal. Safer for your customers. Safer for you.

One Relationship. One Goal

At Chase Paymentech, we think big about small business and we're here to help you grow. This means simplifying what we can to get you where you want to be. With Chase, you can have one relationship with your business bank and your credit card processor.

CHASE MOBILE CHECKOUT IS IDEAL FOR:

- Personal service providers
- Home repair
- Delivery

Any retail establishment that wants to take payments on the go or even on-site locations that want to keep lines moving.

CHASE MOBILE CHECKOUT REQUIREMENTS

Chase Mobile Checkout works on:

Apple iOS devices:

- iPhone® 3GS with at least 6.0 iOS operating system
- iPhone® 4/4S with at least 6.0 iOS operating system
- iPhone® 5 with at least 6.0 iOS operating system
- iPod® Touch with at least 6.0 iOS operating system

Android® devices:

- Select Samsung models, including certain Galaxy, Nexus smartphones
- Select Motorola models, including certain Droid smartphones
- Select LG models, including certain Optimus smartphones
- Select HTC models

Please contact us for more information regarding specific models.

This means that no matter which way you process transactions – in store, online or on the go – you can have one account with one statement and one point of contact. Easy, right? This puts you where you want to be – in front of your customers and not behind a back-office desk.

Convenience for You and Your Customers

Chase Mobile Checkout allows you to take the process out of processing:

- Send receipts to your customers' via email or text.
- Search for specific transactions, create reports, process voids and keep up with your merchant account – all from your smartphone.
- Create an image-based catalog that allows you to select the right product or service every time.
